Army Corps of Engineers and the U. S. Bureau of Reclamation.
- Young, B., H. Britten, and C. Berry. Genetic population structure of emerald shiners in the Missouri and Yellowstone Rivers. Submitted to Copeia.

"Our recent work shows that productivity of a stream is dependent upon the extent and condition of its backwaters and the period of its overflow, a fact which makes drainage district operations on the river bottoms a menace to its productiveness."

(S. Forbs, 1912)
